Bay Diesel Provides Reliable Stand-By Power to Naval Station Norfolk's Distribution Building; Allowing Day to Day Military Operations to Run Uninterrupted

Norfolk, VA –The Defense Logistics Agency is a logistics support agency that provides America's Military Forces and government agencies with a full spectrum of logistics, acquisition and technical services. Naval Station Norfolk's DLA distribution building is one of twenty-four buildings operating worldwide providing our military with medical supplies, food, fuel and more, so it's critical that their day to day operations run with zero interruptions. NAVFAC engineers, who designed the integrated Parallel System found the value of the systems redundancy for their power needs. The basis of the design is a 4 x 750 kW Parallel System that will provide an N+1 Redundancy. The generator system was programmed so that a minimum of two generators must be online to service the load. With that in mind, if a unit required maintenance, the DLA would have the ability to service that generator without a decrease in capability of their backup power system.

About Bay Diesel Corporation

Established in 1982, Bay Diesel & Generator is a veteran-owned small business with offices in Chesapeake, Roanoke and Richmond. Bay Diesel & Generator specializes in diesel engine sales and repair for multiple national brands such as Generac and John Deere as well as generator sales, repair, and maintenance. The company is the regional distributor for Generac Power Systems generators. For more information visit: www.baydiesel.com
