Bay Diesel Helps Prepare The MV Cape Ray for it's Syrian Chemical Mission

Chesapeake, VA - December; 2013, the MV Cape Ray, received special orders to be turbo activated. The MV Cape Ray is normally held in reserve to carry troops, supplies, and vehicles, into theaters of war. However this time the ship was ordered to be retro-fitted with two field deployable hydrolysis systems at its home port in Portsmouth, VA. The hydrolysis systems would be used to assist the United Nations in destroying Syria's chemical weapon stock pile. Bay Diesel & Generator received the call to prepare both Kawasaki-MAN 14V 52/55A main diesel engines, as well as both VS26 Daihatsu diesel generators for the mission critical voyage. Bay Diesel's in house machine shop was able to manufacture 28 fuel protection sleeves for the diesel generators in order to expedite the ships departure. "Having proven themselves many times in the past, Bay Diesel & Generator continue to be crucial partners in keeping the three Cape R vessels in their assigned four day readiness status."

About Bay Diesel Corporation

Established in 1982, Bay Diesel & Generator is a veteran-owned small business with offices in Chesapeake, Roanoke and Richmond. Bay Diesel & Generator specializes in diesel engine sales and repair for multiple national brands such as Generac, CAT & John Deere as well as generator sales, repair, and maintenance. The company is an Authorized Marine Dealer for Caterpillar through Carter Machinery, and the regional distributor for Generac Power Systems generators. For more information visit: www.baydiesel.com.
